

## HOW TO USE THESE CHARTS

**Stockpile Estimates** includes two charts for you. The first calculation of "**Total Diapers Needed**," is the total number of diapers needed calculated from my daughter's weight (based on pediatric visits with a birth weight of just over 9lbs), the average time she was in them and approximate diapers used per day. The "**Average Stockpile Recommendations from 6 Sources**" (yellow) is an average in each size used, from 6 different recommend stockpile sources. This is a great chart to use if you would like to purchase diapers based on average recommendations.

**Calculate Stockpile Estimates for your Baby** was created for you to make your own calculations chart. This chart may be helpful if:

- You have had a previous child and know their weight (on Pediatric take home sheets) and about how long how they were in that size
- You anticipate daily diaper uses to be more or less
- You found another source and would like to record recommended diapers needed

STOCKPILE ESTIMATES								
	EXAMPLE	SIZE N	SIZE 1	SIZE 2	SIZE 3	SIZE 4	SIZE 5	SIZE 6
WEIGHT (LBS)	-	< 10	8-14	12 - 18	16-28	22-37	>27	>35
APPROX. DIAPERS PER DAY	-	10	8	8	6	6	5	5
MONTHS IN DIAPERS	-	2 Weeks	2 Months	3 Months	7 Months	9 Months		
TOTAL DAYS IN DIAPERS	-	14	60	90	210	270		
TOTAL DIAPERS NEEDED = USED PER DAY X NUMBER OF DAYS	-	140	480	720	1260	1620		
AVERAGE STOCKPILE RECOMMENDATIONS FROM 6 SOURCES		220	657	712	1215	1035		

CALCULATE STOCKPILE ESTIMATES FOR YOUR BABY								
	EXAMPLE	SIZE N	SIZE 1	SIZE 2	SIZE 3	SIZE 4	SIZE 5	SIZE 6
WEIGHT (LBS)	8	< 10	8-14	12 - 18	16-28	22-37	>27	>35
APPROX. DIAPERS PER DAY	10							
TOTAL DAYS IN DIAPERS	20							
TOTAL DIAPERS NEEDED = USED PER DAY X NUMBER OF DAYS	= 10 X 20
